

— SUBJECT ACCELERATORS

Twelve weeks to turn *a subject around.*

Live 12-week exam programmes in Biology, Chemistry and Maths. Small groups, specialist tutors, every session taught to the mark scheme.

• Next cohort Sunday 13 September

• Weekend sessions · no clashes

• Biology · Chemistry · Maths

BIOLOGY

CHEMISTRY

MARK SCHEME

+2 marks found

MATHS

Structured exam training, not *more tutoring*.

FORMAT

12 weeks, live online

One two-hour session a week, small groups

FOCUS

Taught to the mark scheme

Real exam questions in every session

SUBJECTS

Biology, Chemistry, Maths

Take one, two or all three

SCHEDULE

Weekends, no clashes

Clear of the school week

SUPPORT

Worksheets, Q&A, recordings

2 to 3 hours of guided practice a week

PRICE

From £339 per subject

Bundles save up to £168

— WHY GRADES GET STUCK

Hard work is not *the problem.*

Most students understand more than their grades show. The marks go missing in application: knowing what the examiner wants, and answering in the language the mark scheme rewards.

Tutors explain content. We train marks.

THIS PROGRAMME

- ✓ Exam questions, not re-teaching
- ✓ Technique trained every single week
- ✓ Weak topics targeted directly

TYPICAL TUTORING

- ✗ Re-explains what school already covered
- ✗ Rarely fixes exam technique
- ✗ Averages £50 an hour, one subject at a time

— WHO BUILT THIS

Built by a doctor who *learned the hard way.*

I did everything school said. Re-reading, highlighting, beautiful notes. I got into medicine only because I threw hundreds of extra hours at a method that wasted most of them. Medical school taught me to study properly. That system runs every session.

- ✓ Specialist tutors who achieved top grades in the subject they teach and helped hundreds do the same
- ✓ Twelve structured weeks: each session builds on the last, right up to exam preparation

Dr Waleed Ahmad, MBBS · NHS foundation doctor · 1,000+ students over six years

We *diagnose* where marks are leaking, *rebuild* revision around what moves them, and *coach* all the way to exam day.

01 · Diagnose

Find the leaks

Every topic rated for real confidence, not familiarity. The avoided topics are where the grade hides.

02 · Rebuild

Point hours at marks

Deep work, recall the next day, spaced review.
Same hours, aimed at the right work.

03 · Coach

Train the technique

Real exam questions, answered in the language the mark scheme rewards.

Every stuck grade is stuck at *one of four tiers*.

First we find the tier that is actually holding the grade back. Then the work gets pointed at that tier, instead of spread thinly over everything.

Tier 1 • Foundation

Understand it

Solid content understanding on its own sits around a C.

Tier 2 • Recall

Remember it

Bring it back from memory in the exam room. High C, low B.

Tier 3 • Application

Apply it

Use it on questions you have never seen before. High B, low A.

Tier 4 • Exam mastery

Perform it

Do it in timed conditions, under pressure, consistently. A and A star.

One-to-one tutoring mostly targets Tier 1. Every session here trains all four, to the mark scheme.

One session a week, a system *around it.*

- ✓ A two-hour live session in a small group: key topics into real exam questions
- ✓ Weekly worksheet of strategic practice, matched to your exam board
- ✓ Weekly Q&A, so misunderstandings never compound
- ✓ Every session recorded, with slides and notes, for catch-up and revision
- ✓ 2 to 3 hours of independent work a week, all of it directed

THE WEEKEND TIMETABLE

Maths

Saturdays 13:00 to 15:00

Biology

Sundays 10:00 to 12:00

Chemistry

Sundays 13:00 to 15:00

No clashes: all three subjects fit in one weekend, clear of school.

Confidence you can *measure*.

6.2 to 8.3

Average topic confidence out of ten, rated before and after each session across these 12-week Biology and Chemistry Accelerators. 74 responses.

1,000+

A-level students worked with over six years.

"I liked how we worked together to get the answers instead of the tutor doing it for us. We go straight into exam practice instead of spending ages on content, and it works."

Maahil

A-Level Chemistry Student

"The exam question walk-throughs were brilliant, really focused on applying what we know rather than just repeating content"
