

— THE SUMMER ACCELERATOR

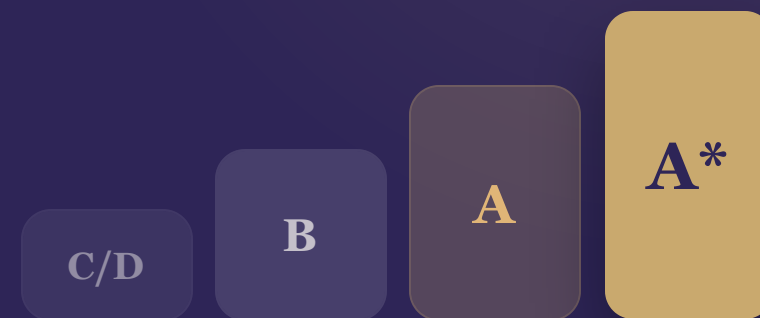

Walk into Year 13 *already ahead.*

A six-week live summer course in the high-yield Year 13 topics that decide predicted grades. Built by a doctor, taught by subject specialists.

• Starts Saturday 8 August

• Six weeks · live online

• Biology · Chemistry · Maths · Physics

Six weeks that set up *the whole year*.

FORMAT

Six weeks, live online

Two sessions a week per subject, two hours each

TEACHING

24 hours per subject

Live specialist teaching, never pre-recorded

SUBJECTS

Biology, Chemistry, Maths, Physics

AQA, OCR and Edexcel

FOCUS

High-yield Year 13 topics

The ones that set predicted grades

SAFETY NET

Every session recorded

Timetabled so subjects never clash

PRICE

From £289 per subject

£9 to £12 an hour of live teaching

— WHY SUMMER MATTERS

Predicted grades are decided *early*.

Year 13 opens with the mocks that set predictions, and predictions carry the UCAS application. The summer before is the one clear window to get ahead of them.

The gap opens in August. September just reveals it.

STUDENTS WHO COAST THE SUMMER

- ✗ Meet key topics for the first time in September
- ✗ Spend the first term catching up
- ✗ Walk into prediction mocks underprepared

STUDENTS WHO USE THE ACCELERATOR

- ✓ Start on top of the high-value topics
- ✓ Stay ahead instead of chasing the class
- ✓ Meet the mocks confident and prepared

— WHO BUILT THIS

Built by a doctor who *learned the hard way.*

I did everything school said. Re-reading, highlighting, beautiful notes. I got into medicine only because I threw hundreds of extra hours at a method that wasted most of them. Medical school taught me to study properly. That system runs every session.

- ✓ Taught live by specialists who achieved top grades in their subject and helped hundreds do the same
- ✓ Dr Waleed teaches the final sessions himself: exam technique, active recall, study strategy

Dr Waleed Ahmad, MBBS · NHS foundation doctor · 1,000+ students over six years

We *diagnose* where marks are leaking, *rebuild* revision around what moves them, and *coach* all the way to exam day.

01 · Diagnose

Find the leaks

Every topic rated for real confidence, not familiarity. The avoided topics are where the grade hides.

02 · Rebuild

Point hours at marks

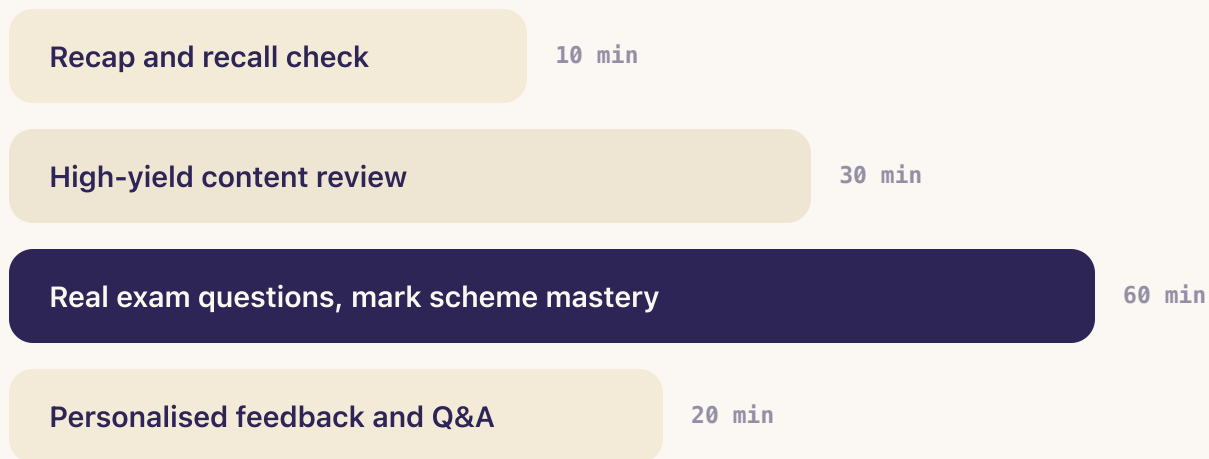

Deep work, recall the next day, spaced review.
Same hours, aimed at the right work.

03 · Coach

Train the technique

Real exam questions, answered in the language the mark scheme rewards.

Two hours, engineered *for marks.*

EVERY PACKAGE INCLUDES

- ✓ 24 hours of live teaching per subject
- ✓ Every session recorded
- ✓ No clashes between subjects
- ✓ Final sessions led by Dr Waleed
- ✓ First session risk-free

Students feel the difference *and say so.*

6.2 to 8.3

Average topic confidence out of ten, rated before and after each session across our recent 12-week Biology and Chemistry programmes. 74 responses.

1,000+

A-level students worked with over six years.

"I liked how the session was so exam-technique focused, with a great balance of exam questions and the content behind them."

Furkan

Year 13 Student

"The content was explained really well and there was a brilliant range of questions. I love the way everything is taught"

Menahil

Year 13 Student
