

— TOP 1% MENTORSHIP

Stay ahead *without burning out.*

Working directly with Dr Waleed on how you study, revise and perform in the exam. Not subject tutoring: one system that moves every subject at once.

- Working directly with Dr Waleed

- Not subject tutoring

A system for every subject *at once*.

WHAT IT IS

Not subject tutoring

The system for how you study, across every subject

WHO IT IS FOR

Hard workers, stuck grades

Students whose problem is how they study

FORMAT

At least four months

Building your systems directly with Dr Waleed

THE METHOD

Diagnose, rebuild, coach

Three phases, one system

SAFETY NET

First session risk-free

Full refund, no questions asked

WHERE IT LEADS

96% get their first choice

University offer, and on average a 2 grade increase

— THE REAL CHALLENGE

The content is not *the hard part*.

Lessons, homework, revision, mocks and UCAS all land at once. Most students respond by working harder. That is exactly why they stay stuck.

You're not struggling because you're lazy. You're using the wrong system.

MOST STUDENTS

- ✗ Try to do everything at once
- ✗ Study for hours and see no improvement
- ✗ Rely on willpower and burn out

TOP STUDENTS

- ✓ Focus only on what moves the needle
- ✓ Follow a system, not a feeling
- ✓ Stay consistent without burning out

Every stuck grade is stuck at *one of four tiers*.

Every tier sits on the one below it. Most students are stuck part way up and keep re-learning the bottom step. We find the tier that is actually holding the grade back, then aim the work there.

WHAT EACH TIER GETS YOU

A and A star

In timed conditions, under pressure, again and again.

High B, low A

On questions you have never seen before.

High C, low B

Brought back from memory in the exam room.

About a C

Understanding the content, and nothing above it.

School has time to teach Tier 1. This system climbs all four.

— WHO BUILT THIS

Built by a doctor who *learned the hard way.*

I did everything school said. Re-reading, highlighting, beautiful notes. I got into medicine only because I threw hundreds of extra hours at a method that wasted most of them. Medical school taught me to study properly. That system is what I teach here.

- ✓ The systems I built through my own A-levels and refined under medical school pressure
- ✓ Method over subject: it works across every A-level you take

Dr Waleed Ahmad, MBBS · NHS foundation doctor · 1,000+ students over six years

Diagnose, rebuild, *coach*.

PHASE 1

Diagnose

We find where the marks are actually going before we change anything.

- ✓ Every topic rated for real confidence, not familiarity
- ✓ An audit of the week: where the hours go and what they buy
- ✓ Past paper marks broken down by tier to find the leak
- ✓ A weekly plan built around your real school timetable

YOU LEAVE WITH

A written plan you can still follow on a bad week.

PHASE 2

Rebuild

The revision method itself gets rebuilt around what the diagnosis found.

- ✓ Blurting, active recall and spaced review, taught and timed
- ✓ Weakest topics get the most sessions, strong ones get maintenance
- ✓ An error log: every dropped mark logged, sorted and retested
- ✓ A check-in on every call: what got done, what slipped, what changes

YOU LEAVE WITH

A method that survives a heavy school week.

PHASE 3

Coach

We train exam performance until the grade holds under pressure.

- ✓ Full questions under timed conditions, set between every call
- ✓ Mark scheme language drilled: what describe, explain and analyse pay for
- ✓ Mock post-mortems: every lost mark traced to a tier and fixed
- ✓ The exam week routine: timing, nerves and the last 48 hours

YOU LEAVE WITH

A paper you walk into knowing how you will attack it.

The results, and the students *behind them.*

96%

of our students get their first-choice university offer.

2 grades

the average jump our students make across the programme.

1,000+

A-level students worked with over the last six years.

★★★★★

"It wasn't my knowledge, it was exam technique. Going through the questions and seeing how the tutor scored them is what changed it."

Vernon

A and A in Biology and Chemistry · Medicine at Brighton and Sussex

★★★★★

"It would have been harder to revise all on my own. Sticking to the strict two hours and getting everything done in it is easier than managing it all yourself."

Sarah

A star in Biology · Veterinary Science at Bristol, her first choice

★★★★★

"The programme really gave me that confidence. That weekly structure, going through topic by topic, and then exam technique at the end."

Furkan

Medicine at Birmingham, his first choice

— BEFORE WE TALK PRICE

What one-to-one tutoring *really* costs.

On average, one-to-one tutoring costs £40 to £50 an hour.

An hour

£40 to £50

2 hours a week

£80 to £100

Every month

£320 to £400

AND THAT'S

For one subject.

Every other subject you add costs the same again.

AND IT ALL SITS IN

Tier 1, Foundation.

Re-teaching content, which isn't what's holding the grade back.

The Top 1% *Mentorship*.

WORKING DIRECTLY WITH DR WALEED

£300 per month

✓ Personalised performance plan ✓ Fortnightly calls, year-round ✓ Priority support between calls

Your first session is risk-free.

Come to the first session. If you're not completely satisfied, you get your money back, no questions asked.

— THE NEXT STEP

Fix how you study, and every subject *moves at once.*

- 01 Agree your personalised plan on this call.
- 02 Start working directly with Dr Waleed.
- 03 Come to your first session risk-free. Not satisfied? Full refund.
