

— TOP 1% STUDY SYSTEM

Stay ahead *without burning out.*

Workload, revision method and exam performance, taught as one system. The method behind everything we run, for students whose problem is how they study.

- Next cohort Wednesday 16 September

- Live online · three levels of support

- From £119

A system for every subject *at once*.

WHAT IT IS

A system, not more tutoring

How to study, not another content class

WHO IT IS FOR

Hard workers, stuck grades

Students whose problem is how they study

FORMAT

Live sessions and Q&A

Learn the system, then implement it with support

THE ARC

Build, fix, optimise

Four weeks of foundations, eight of implementation

SAFETY NET

First session risk-free

Full refund, no questions asked

PRICE

From £119

Accelerator £499 · Mentorship £2,000 a year

— THE REAL CHALLENGE

The content is not *the hard part*.

Lessons, homework, revision, mocks and UCAS all land at once. Most students respond by working harder. That is exactly why they stay stuck.

You're not struggling because you're lazy. You're using the wrong system.

MOST STUDENTS

- ✗ Try to do everything at once
- ✗ Study for hours and see no improvement
- ✗ Rely on willpower and burn out

TOP STUDENTS

- ✓ Focus only on what moves the needle
- ✓ Follow a system, not a feeling
- ✓ Stay consistent without burning out

— WHO BUILT THIS

Built by a doctor who *learned the hard way.*

I did everything school said. Re-reading, highlighting, beautiful notes. I got into medicine only because I threw hundreds of extra hours at a method that wasted most of them. Medical school taught me to study properly. That system is what I teach here.

- ✓ The systems I built through my own A-levels and refined under medical school pressure
- ✓ Method over subject: it works across every A-level you take

Dr Waleed Ahmad, MBBS · NHS foundation doctor · 1,000+ students over six years

Four weeks to install *the system*.

Week 1

Take control of the workload

Cut low-impact work and build a weekly plan you can actually follow.

Week 2

Start without a fight

Why procrastination happens, and the system that gets work started quickly.

Week 3

Carry heavy weeks

Manage time and energy so pressure never turns into burnout.

Week 4

Revise like the top 1%

The right revision method for the right situation, so weak topics actually move.

The first four weeks build your system. The next eight make it *stick*.

Phase 1 · Weeks 1 to 4

Build your system

Workload under control, a structured weekly plan, revision that works.

Phase 2 · Weeks 5 to 8

Fix what is not working

Find why progress stalls, repair the method, learn what to cut.

Phase 3 · Weeks 9 to 12

Optimise performance

Sharper exam approach, mistakes turned into progress, a system that keeps improving.

What students say when it *clicks*.

1,000+

A-level students worked with over six years.

Every programme

This system is the layer under our subject courses: the method every session runs on.

"The topics were really hard to approach while researching alone so seeing it broken down into manageable points was useful to apply it even better"

Delicia

Year 13 Student

"All the information provided was clear and understandable. It was really helpful and improved my confidence!"

Biju

Gap Year Student

Choose the level of support.
